

 Your go to update for smarter legal practice

Curated by the Law Society of Singapore's Technology & Innovation Committee

Which AI Tools can support your practice?

* examples do not constitute endorsements of any specific product

General Purpose Foundation Models

Gemini (Google)

- **Multimodal Architecture:** analyses text, images and videos simultaneously
- **Workflow Integration:** operates natively with Google applications
- **1M Token Window:** holds up to 1,500 pages of memory each active session on the Pro plan

Claude (Anthropic)

- **Constitutional AI:** model is trained on specific principles aimed to minimise harmful outputs
- **200k Token Window:** holds 500+ pages of memory each active session on paid plans
- **App Integration:** Connects with over 500 applications

ChatGPT (OpenAI)

- **Custom GPTs:** create assistants to automate tasks without any coding
- **256k Token Window:** GPT 5.4 Thinking memory limit each active session on the Business plan
- **Deep research:** performs multi-step research presented in a clear report with citations

Copilot (Microsoft)

- **Workspace Grounding:** connects with Microsoft 365 apps to generate insights to prompts
- **Data Security:** Copilot conversations are not used to train underlying Copilot models
- **Copilot Studio:** Low-code tools to build agents for specialized tasks (e.g. HR assistance)

Mistral (Mistral AI)

- **Sovereign Infrastructure:** designed for GDPR compliance
- **Enterprise OCR:** accurately processes scanned documents and images in various languages
- **Configurable Agents:** create assistants to execute tasks without any coding (in beta)

Specialised Legal AI Tools

CoCounsel (Thomson Reuters)

- **Westlaw&Practical law Integration:** Research drawn from verified legal databases
- **Tabular Analysis:** reviews up to 10,000 documents and generates its analysis in a table-based format
- **Supports Microsoft 365 integration**

Lexis+ AI (Lexis Nexis)

- **Grounded Research:** provides clickable verified links to legal sources in LexisNexis' repository
- **Multi-Model Intelligence:** select different foundation models for various tasks
- **Intelligent Drafting:** draft personalised legal documents that flags areas of improvement

Vincent AI (vLex)

- **Global Platform:** repository containing over 1 billion documents from more than 100 countries
- **Agentic Workflows:** customisable no-code workflows for disputes and corporate work
- **Minimises hallucinations:** research and drafting supported by vLex's database

Harvey (Harvey AI)

- **Vaults:** supports large volume simultaneous document analysis of up to 100,000 files/vault
- **Workflow Agents:** customisable automation agents with plain language prompts
- **Microsoft 365 Integration:** Operates as a native side-bar in Word

August Legal AI (August)

- **Customisable Playbooks:** analyses precedents and extracts patterns into reusable rules
- **Microsoft 365 Integration:** AI is directly accessible on Word, Outlook and Sharepoint
- **Tabular Review:** generates a table-based review with citations linked to each document

TOOL	PRICING (SGD)	KEY STRENGTH	SECURITY
GEMINI PRO	\$28.99/user/month	Large token context window (active session memory)	SOC 1/2/3, ISO 27001 & 42001 compliant
CLAUDE PRO	\$22~ /user/month paid yearly	Constitutional AI trained to minimise harmful outputs 	SOC 2 Type I/II, ISO 27001 & 42001 compliant
CHATGPT BUSINESS	\$32/user/month paid yearly	Customisable GPTs to automate different workflows 	SOC 2 Type II, ISO 27001 & 42001 compliant
COPILOT BUSINESS	\$24~ /user/month paid yearly	Native integration with Microsoft 365 	SOC 2 Type II, ISO 27001 & 42001 compliant
MISTRAL AI PRO	\$20~ /user/month paid yearly	High accuracy OCR to support document analysis 	SOC 2 Type II, ISO 27001 compliant
COCOUNSEL	Custom/Enterprise	Grounded research and drafting from verified legal databases and uploaded firm documents	ISO 27001 & 42001 compliant
LEXIS+ AI	Custom/Enterprise	Grounded research from LexisNexis' database with verifiable citations that minimise hallucinations	SOC 2 Type II, ISO 27001 compliant

Pilot Programs

1

Legal Innovation and Future-Readiness Transformation (LIFT) Initiative Pilot

- The Ministry of Law's (MinLaw) LIFT initiative supports **small and medium** sized Singapore law firms adopt legaltech solutions
- A legaltech consultant will assist firms in evaluating their **unique needs and concerns** against various legaltech solutions, guiding the selection process based on weighted criteria
- Firms will receive support throughout the implementation process with extended **support of 5 months post-implementation**
- A portion of the legaltech consultancy fees is **subsidised** by MinLaw

Vacancies: 20-30 Law Firms

2

Kapacia Pilot Program

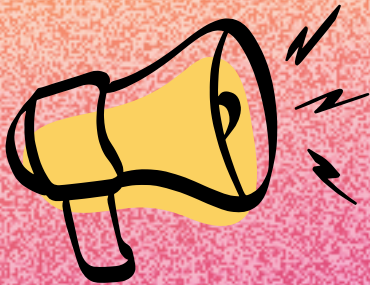

- Kapacia is a **privacy-first AI transcription solution** built for regulated industries (e.g. legal and advisory roles)
- **Explicit client consent** is obtained before documenting client conversations
- Data is stored and processed **locally**, and is not used to train AI models
- Detects and **masks sensitive personal information** before records are stored or shared
- Pilot participants will receive **preferential pricing and priority onboarding**

Vacancies: Up to 3 Law Firms
