

LEGAL TECH BULLETIN 2025

Your go-to update for smarter legal practice 

Summary of the IT Committee's 2025 Survey Results

This year 55 respondents participated in the IT Committee's Survey on Technology Adoption and Collective Negotiation in Small and Mid-sized Law Firms.

51 of the 55 respondents indicated that increased costs is the main barrier to adopting new technology solutions

Legal Research Tools, Document Management Systems and E-discovery tools are the top 3 legal tech solutions firms are considering to adopt in the next 12 months

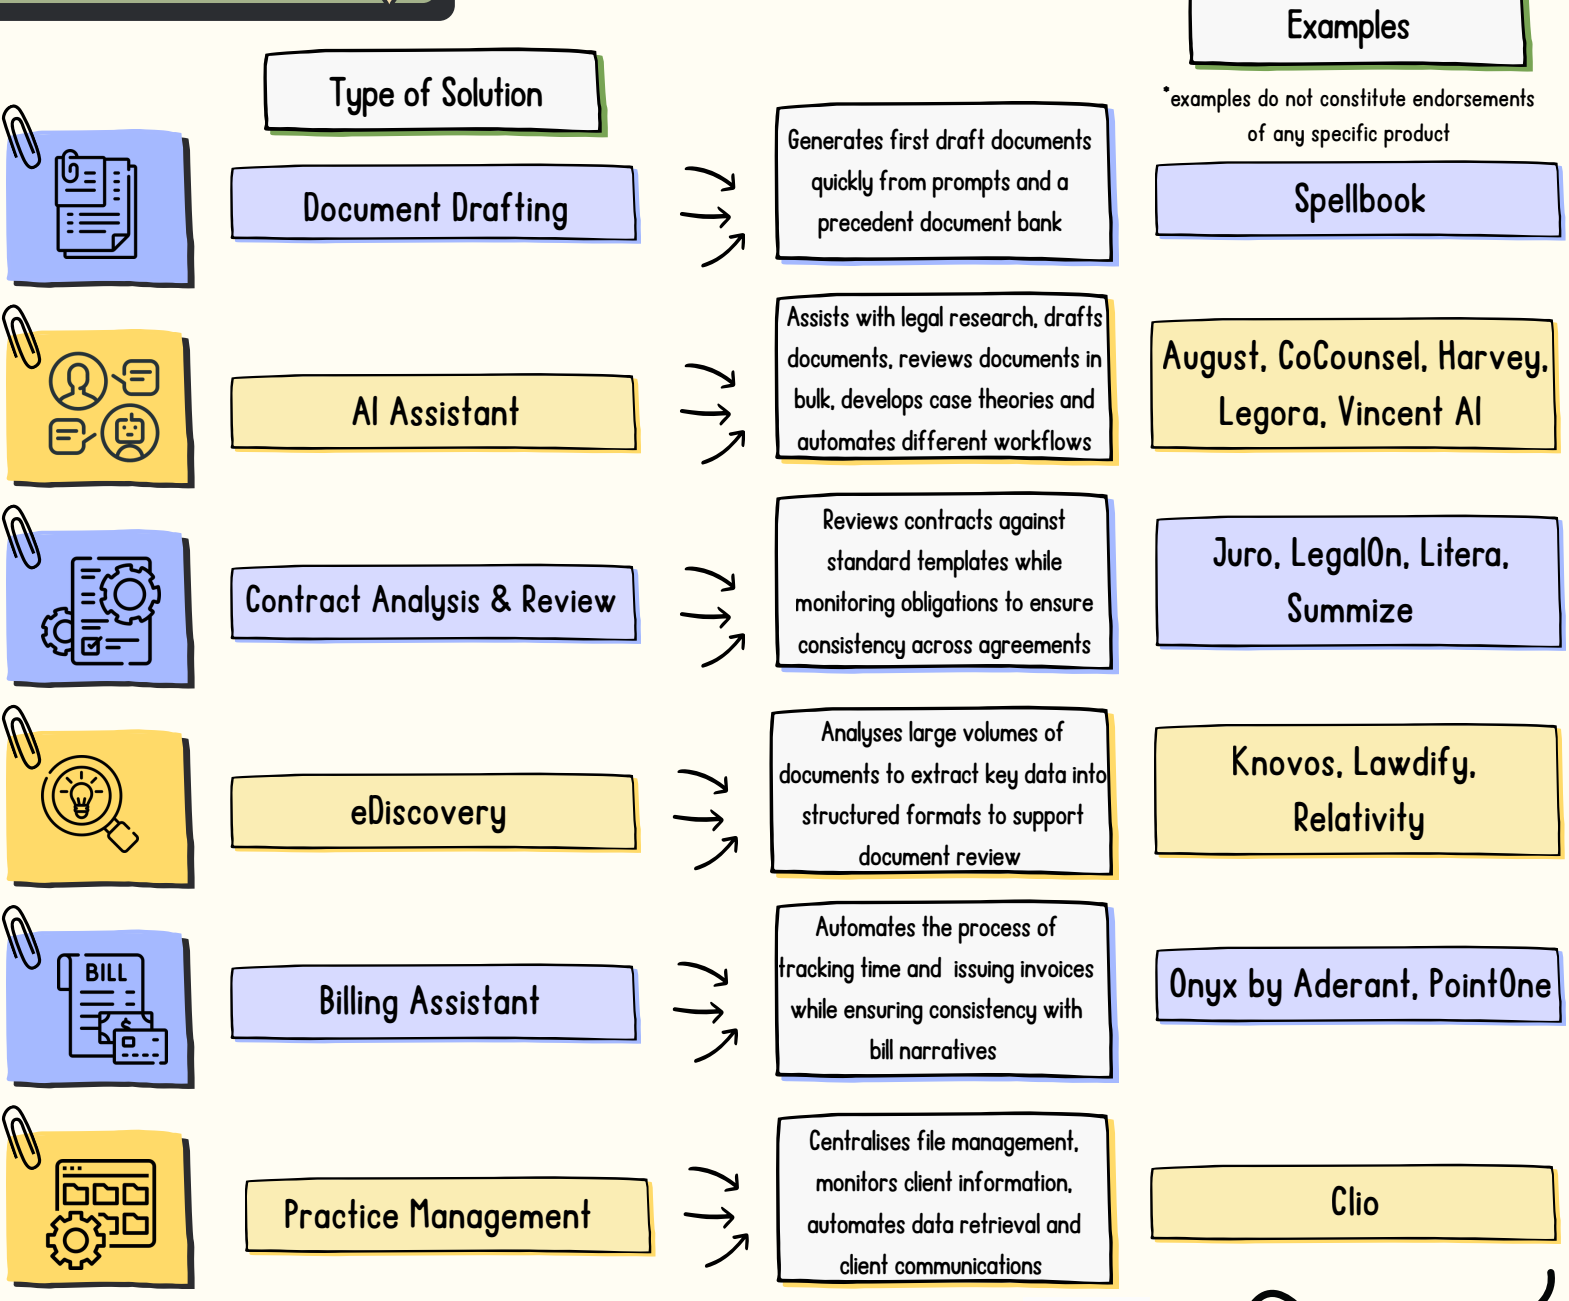

27 respondents indicated that integration with existing systems and a lack of time to evaluate options are barriers to adopting new technology solutions

80% of respondents indicated they would be interested in collaborating with other law firms to collectively negotiate discounts for bulk software license purchases

The top 5 reasons for adopting new technology solutions are to improve efficiency, reduce costs, stay competitive, enhance client services and to increase profitability

What legal tech solutions are available?

The adoption of GenAI integrated software solutions has surged in the legal industry. These solutions streamline workflows across the firm. They range from billing management platforms to specialized AI assistants that help lawyers complete tasks in a fraction of the time.

Where eligible, apply for funding / support schemes launched by government agencies. Visit www.gobusiness.gov.sg/productivity-solutions-grant/all-psg-solutions for available grants.
