Legal Tech Bulletin 2026 Vol 2

THE LAW SOCIETY OF SINGAPORE

Your go to update for smarter legal practice

Curated by the Law Society of Singapore's Technology & Innovation Committee

Newsflash: Highlights from The Lion's Pit

Co-organised by the Law Society and MinLaw at this year's TechLaw.Fest, The Lion's Pit brought a Shark Tank-style edge to legaltech innovation. Challenged to tackle pressing industry pain points, 3 finalists took the stage addressing different problem statements facing a high-stakes pitch followed by a rapid-fire Q&A with the judges. StrongKeep clinched 1st place with Lexagle and Northbridge Lab rounding out the podium at 2nd and 3rd place. Find out more about their innovative solutions below!

StrongKeep — Enterprise-Grade Cybersecurity on a consumer-tier budget (1st)

- All-in-one cybersecurity platform for small and medium-sized firms, run without an in-house IT team with easy setup through Microsoft 365 or Google Workspace
- Enterprise-grade protection on every laptop and phone, blocking malicious files before they open
- Stops loading scam & phishing sites plus a team password manager & short staff training quizzes
- Free scan of your firm's domain at cyberscan.strongkeep.com to spot security gaps early
- Ready-to-use crisis playbooks for what to do if you suspect an incident

Lexagle — Transforming Yesterday's Chaos into tomorrow's rescue (2nd)

- AI powered contract management platform that manages the full contract life cycle from creation to signing and renewal within one platform
- Document Guard feature reviews documents to ensure compliance with precedents
- Document management systems with content based searches enabled for images
- Adheres to international standards (e.g. GDPR, ISO 27001, HIPAA and the eIDAS Regulation)
- Integrates with Microsoft 365, Google Drive and other business applications

Northbridge Lab — Unlocking Smarter Workflows for the future law firm (3rd)

- Used by several Singapore law firms for fixed-fee work in PIPD and conveyancing
- Automates repetitive work, organising documents, drafting letters, compiling quantum schedules and preparing completion accounts
- Follows firm's precedents and processes, keeping work consistent across the team
- Keeps matter information, deadlines and know-how accessible amid staff turnover
- Helps your team handle more cases with less administrative work

Law Society members get 25% off StrongKeep's base plan for the first year with code **SK-TECHLAWFEST-2026** at strongkeep.com. SMEs are eligible for up to 50% business grant support for the adoption of StrongKeep Protection, a Pre-Approved Solution under the IMDA SMEs Go Digital programme.

Looking for more home-grown AI solutions?

*examples do not constitute endorsements of any specific product

A&GEL

- Customised tool that assists with various workflows such as reviewing contracts, translating documents, generating first cut drafts based on firm precedents, comparing multiple documents and taking meeting minutes without any model training of user data
- Designed to exceed the security requirements of law firms and government agencies
- Supports on-premise, private cloud or A&GEL cloud deployments with per user pricing
- Disaster recovery with redundant backups and rapid recovery to avoid data loss

AITHENA

- Drafts contracts (NDAs, SAFEs, employment contracts etc) from Singapore-law templates and provides risk-stratified reviews (red/amber/pass) for uploaded contracts
- Delivers answers to natural language questions grounded directly in thousands of Singapore court judgments and local legislation (matches you to a lawyer when needed)
- Summarises and aggregates publicly listed CPD courses to help Singapore lawyers discover relevant training

BriefTech

- Built for disputes lawyers that helps automate bulk document processing and bundling
- Assembles affidavits and exhibits including an auto-generated index of exhibits
- Compiles Bundle of Authorities & Documents into required no.of volumes with page limits
- Generates a list of documents from uploaded files by proposing document date & description
- Paginates bundles with bookmarks and tabs in one click

Which AI solution should you use?

*The sample prompt below is for general reference only. Verify all tool pricing, grant details and security compliance directly with vendors and authorities before adoption.

Wondering which AI tools are the best fit for your practice? Ask an AI! Use the sample prompt below to get your favorite AI tools to respond like your personal LegalTech consultant. It assesses your firm's bottlenecks, recommends appropriate tools, and highlights local grants to lower your costs!

You are a practical legal technology adviser for small and mid-sized law practices in Singapore. Your job is to help me find technology that solves my actual problems, at a price that fits my practice.

About my practice:

- Practice area(s): [e.g. family, conveyancing, commercial litigation, corporate]
- Size: [number of lawyers and support staff]
- Current tools: [e.g. Word, Outlook, Excel, paper files, an existing practice management system]
- Budget: [monthly or yearly figure, or "not sure"]
- Problems I face: [e.g. time lost on billing, slow document drafting, missed deadlines, messy file management, client intake]

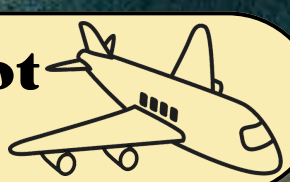

How to work with me:

- Start by interviewing me. Ask one question at a time, no more than 8 questions in total. Fill any gaps above, and find out which problem costs me the most time or money.
- Summarise my needs in 5 bullet points or fewer. Ask me to confirm before you continue.
- Recommend 3 to 5 solutions that are available in Singapore. Cover the categories that match my problems, such as practice management, billing, document automation, legal research, e-signature, or AI drafting tools.
- For each solution, give: what problem it solves for me, the vendor name, the typical price (per user per month, or setup fee), the pricing source and date, and one main limitation.
- Tell me which government grants may reduce the cost, such as the Productivity Solutions Grant (PSG). State the current eligibility and support level only if you can verify them from an official source.
- Finish with a ranked shortlist and one next step for each option, such as "book a demo" or "start a free trial".

Rules:

- Use current information. If you cannot confirm a price, write "price not published — ask the vendor". Do not guess.
- Prefer simple tools that my team can adopt in under a month.
- Flag any data-protection or client-confidentiality concern, for example where client data is stored overseas.
- Use plain English. No sales language.

The Launchpad: Pilot Programs

1 GavelNet

- AI research platform that structures cases into Facts, Issues, Conclusions and Outcomes ('FICO' model)
- Provides a side by side case comparison and analysis in one tab
- Combines keyword matching, semantic retrieval and legal authority signals to surface more relevant Singapore case law
- Search hits show overlapping legal principles or statutes, shared issues, reasoning and match strength
- Selected law firms will be onboarded at no costs for the pilot period
- Pilot Timeline: (1) Selection (Oct - Nov 2026) (2) Onboarding (Nov 2026) (3) Pilot Period (Nov 2026 - Feb 2027)(4) Review (Mar 2027)
